DETAILED ACTION

Claim Objections

Claim 3 is objected to because of the following informalities: "**the associated supply assembly**" should correctly be -- **the supply assembly** --. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 6, 14, 15, 17, 22-24 are rejected under 35 U.S.C. 102(b) as being anticipated by Bell (5,898,342).

Regarding claims 1, 17, 22, Bell (Figs. 2, 3) discloses a power amplifier arrangement comprising: a power amplifier (218); a buffer (212) can be read as digital buffer; a signal processor can be read as an envelope profiler; and POWER and SW (220, 214) can be read as supply control having the connections and functions thereof.

Regarding claims 2, 6, 24, wherein DAC (226) can be read as claimed supply assembly.

Regarding claims 14, 15, only specifies intended uses of the invention, wherein the reference circuit is capable of implementing in the telecommunication system having a transmitter.

Regarding claim 23, wherein SW (214) can be read as means for synchronizing the input signal via signal processor (210) and the supply signal via POWER (220).

Allowable Subject Matter

Claims 3-5, 7-13, 16, 18-21, 25, 26 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 3-5, 7-13, 16, 18-21, 25, 26 call for, among others, note claimed subject matters.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The additional references (Stengel (5,442,317); Myers et al. (5,831,475); Shaw (6,107,880)) disclose amplifier having control power supply.
